Safety Data Sheet

D-Ice aerosol

1. Identification

Product identifier:	D-Ice aerosol
Other means of identification:	587
Recommended use:	DE-ICER
Restriction on use:	Any that differs from the recommended use
Supplier Name:	Prolab 4531 Rue Industrielle Thetford Mines,, QC Canada, G6H 2J1
Telephone:	1-888-449-1626
Emergency tel. number:	1-888-226-8832
Available hours:	Monday to Thursday 8h-5h

2. Hazard identification

Signal word: DANGER

Product classification:

Flammable gases - Category 1A.

Gases under pressure - Category liquefied.

Acute toxicity-dermal - Category 3. Acute toxicity-inhalation - Category 3. Acute toxicity-oral - Category 3.

Specific target organ toxicity – single exposure - Category 1.

Hazard statement(s):

H220 - Extremely flammable gas.
H280 - Contains gas under pressure; may explode if heated.
H301 - Toxic if swallowed.
H311 - Toxic in contact with skin.
H331 - Toxic if inhaled.
H370 - Causes damage to organs.

Precautionary statement(s)

Prevention: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not breathe dust and aerosol. Wash hands thoroughly after handling and any other part of the body that may have been exposed to the product. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves, protective clothing, eye and face protection.

Response: Leaking gas fire: Do not extinguish, unless leak can be stopped safely. In case of leakage, eliminate all ignition sources. IF ON SKIN: Wash with plenty of water. Call a POISON CENTER or doctor if you feel unwell. Take off immediately all contaminated clothing and wash it before reuse. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or a doctor. IF SWALLOWED: Immediately call a POISON CENTER. Rince mouth. IF exposed or concerned: Call a POISON CENTER or a doctor.

Powered by the software Kalium Solutions inc. All Rights Reserved.

Storage: Keep container tightly closed. Store in a well ventilated place. Store locked up. Protect from sunlight.

Disposal: Dispose of contents/container in accordance with local, regional, national and/or international regulations in force.

Other hazards: Not applicable

See toxicological information, section 11

3. Composition / Information on ingredients

No	CAS No :	Common name and synonyms	Concentration % (w/w)
1	67-56-1	Methyl alcohol. Methanol. Wood alcohol	65.00 - 85.00 *
2	74-98-6	Propane	10.00 - 30.00 *
3	75-28-5	Isobutane. 2-Methylpropane	5.00 - 10.00 *

* The actual concentration range is withheld as a trade secret.

4. First-aid measures

If swallowed, irritation, any type of overexposure or symptoms of overexposure occur during use of the product or persists after use, immediately contact a POISON CENTER, an EMERGENCY ROOM or a PHYSICIAN; ensure that the product safety data sheet is available.

Eye contact: Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention as soon as possible.

Skin contact: Remove contaminated clothing immediately. Wash the skin with soap and water. Thoroughly wet contaminated clothing. If irritation persists, consult a doctor.

Inhalation: Move exposed person to fresh air. Keep this person warm and lying down. Loosen tight clothing such as a collar, tie, belt or waistband. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Get medical attention immediately.

Ingestion: If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do not induce vomiting unless instructed by medical personnel.

Symptoms: We can observe headaches, nausea, vomiting and dizziness. Redness, flaking and cracking of the skin.

Effects (acute or delayed): Can cause depression of the central nervous system. May cause at high concentration, breathing difficulty, loss of consciousness, deep coma and possibily death.

Immediate medical attention and special treatment: No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

5. Fire-fighting measures

Suitable extinguishing media: Use dry chemical, CO_2, water spray (fog) or foam.

Unsuitable extinguishing media: Jets of water can facilitate the spread of fire.

Specific hazards arising from the hazardous product: Pressurized container. May explode when heated.

Hazardous combustion products: Carbon monoxide and dioxide.

Special protective equipment and precautions for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

Personal precautions: No action shall be taken involving any personal risk or if you do not have suitable training or protection. Evacuate surrounding areas. Do not touch or walk through spilled material. Shut off all heating and ignition sources. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).

Protective equipment and emergency procedures: Avoid dispersal of spilled material, runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution. Use inert absorbent or retention tubes in the event of a large spill.

Methods and materials for containment and cleaning up: Stop leak if without risk. Move containers from spill area. Contain leaks and pick up with non-combustible absorbent materials such as sand, earth or vermiculite. Then, place in an appropriate waste disposal container according to local regulations. Dispose of via a licensed waste disposal contractor.

7. Handling and storage

Precautions for safe handling: Pressurized container. Avoid contact with eyes, skin and clothing. Avoid breathing mist and spray. Aerosol container cap should always be kept in place unless product is in use. Avoid violent shock and dropping. Never use a damaged container. Do not use aerosols for purposes other than their intended use. Do not heat. Use away from heat, sparks, open flames or any source of ignition. Use non-sparking tools. Wear appropriate personal protective equipment (see Section 8). Do not eat, drink or smoke in areas where this product is handled, stored or processed. Persons working with this product should wash hands and face before eating, drinking or smoking. Remove contaminated clothing and protective equipment before entering eating areas.

Conditions for safe storage: Store in accordance with local regulations, in a suitable and permitted location. Store aerosol containers in a closed cabinet or on a shelf with an anti-tilt edge. Store in a dry, cool, well-ventilated area, protected from direct light, away from incompatible materials (see Section 10) and food. Containers must be kept upright to prevent leakage.

IDLH: Immediately Dangerous to Life or Health Concentrations
NIOSH: National Institute for Occupational Safety and Health
OSHA: Occupational Safety and Health Administration
PEL: Permissible Exposure Limits
California / OSHA: California Division of Occupational Safety and Health
REL: Recommended Exposure Limits
ACGIH ®: American Conference of Governmental Industrial Hygienists
TLV ®: Threshold Limit Values

Appropriate engineering controls: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Individual protection measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eyes: DO NOT WEAR CONTACT LENSES. Wear anti-splash safety goggles.

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties.

Respiratory: If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Others: Wear protective clothing with long sleeves and appropriate safety shoes at all times.

9. Physical and chemical properties

Physical state: Aerosol
Colour: clear
Odour: alcohol
Melting/Freezing point: Not applicable, contents under pressure
Initial boiling point/boiling range: Not applicable, contents under pressure
Flammability: Not available
Lower flammable/explosive limit: 6 % at 25 °C
Upper flammable/explosive limit: 36 % at 25 °C
Flash point: Not applicable, contents under pressure
Auto-ignition temperature: Not applicable, contents under pressure
Decomposition temperature: Not applicable, contents under pressure
pH: Not applicable
Kinematic viscosity: >1 mm^2/s (at 40 °C)
Solubility (in water): Soluble
Partition coefficient – n-octanol/water (Log Kow): Not available
Vapour pressure: Not applicable, contents under pressure
Density and relative density: 0.8 kg/L at 20 °C (water = 1)
Relative vapour density: > 1 (air = 1)
Particle characteristics: Not applicable

10. Stability and reactivity

Reactivity: Stable under recommended conditions of storage and handling. Gases are dangerous because of the high pressures in the bottles. A discharge may be deliberate or accidental due to the failure of a valve or safety device. Even at low pressure, gas can escape from an open or leaking bottle.

Chemical stability: The product is chemically stable under normal conditions of use. An increase in temperature, pressure or a strong shock can cause the gas to explode.

Possibility of hazardous reactions: Danger of explosion when heated. Violent reaction or explosion in contact with incompatible compounds.

Conditions to avoid: Do not pierce or burn, even after use. Keep away from incompatible products (see section 7). Some risk may be expected of corrosive and toxic decomposition products. To avoid thermal decomposition, do not overheat.

Incompatible materials: This product may attack certain metals, types of plastics, rubbers or coatings.

Hazardous decomposition products: Carbon monoxide and dioxide. Formaldehyde.

Degradability: N/A

Mobility in soil: N/A

13. Disposal considerations

Methods of disposal: The generation of waste should be avoided or minimized wherever possible. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Close the bottle and return it to the supplier.
