

D-ICE LUB

De-icer lubricant

Description

PROLAB's D-ICE LUB is the best lubricant & de-icer on the market. Its de-icing action works virtually at-once and leaves a protective lubricant on locks.

Characteristics and Benefits

D-ICE LUB's unique formula provides a number of benefits not found in other regular products. It de-ices quickly, penetrates deeply to protect treated parts against corrosion and leaves a superior-quality lubricating film. D-ICE LUB is efficient in temperatures as low as -50°C, thus preventing locks from freezing. Clean and environmentally friendly, D-ICE LUB leaves no residue and is biodegradable.

Types of Application

D-ICE LUB's superior qualities make it suitable for industrial as well as commercial use. Use it on locks, padlocks, hinges, and other similar objects or equipment.

Directions for Use

Apply D-ICE LUB directly on object to be treated.

Available Sizes

In Spray: 50 g

Product Code

587

Characteristics	ASTM Test	Typical Values
Flash Point	D56	11,5°C
Pour Point (Base Oil)	D97	-62°C
Pour Point (Solvent)	D97	-98°C

Specific Gravity at 15°C	D4052	0,80 gr/cm ³
Viscosity at 40°C	D445	0,6 cSt
Appearance		Clear Fluid Liquid
